

Your business, reimagined as one *intelligent* system.

*A blueprint of the AI-powered platform we will build for Blythe Diva —
where elegance meets intelligence, and the heavy lifting runs quietly in the
background.*

You're not buying a website. You're buying back your day.

Running Blythe Diva today means uploading products by hand, answering the same WhatsApp questions, keeping retail and wholesale from tangling, and chasing records across apps. We're building a single system that does the repetitive work for you — so your hours go to decisions and design, not data entry.

Time

Minutes of oversight instead of hours of manual work.

Accuracy

Prices, stock and records stay correct on their own.

Visibility

See the whole business clearly, on one screen.

Control

Sensitive actions still need your approval — always.

Scalability

Built to carry thousands of designs without strain.

Less dependency

The shop runs even when you're not watching it.

"Where elegance meets empowerment" — now with a system to match.

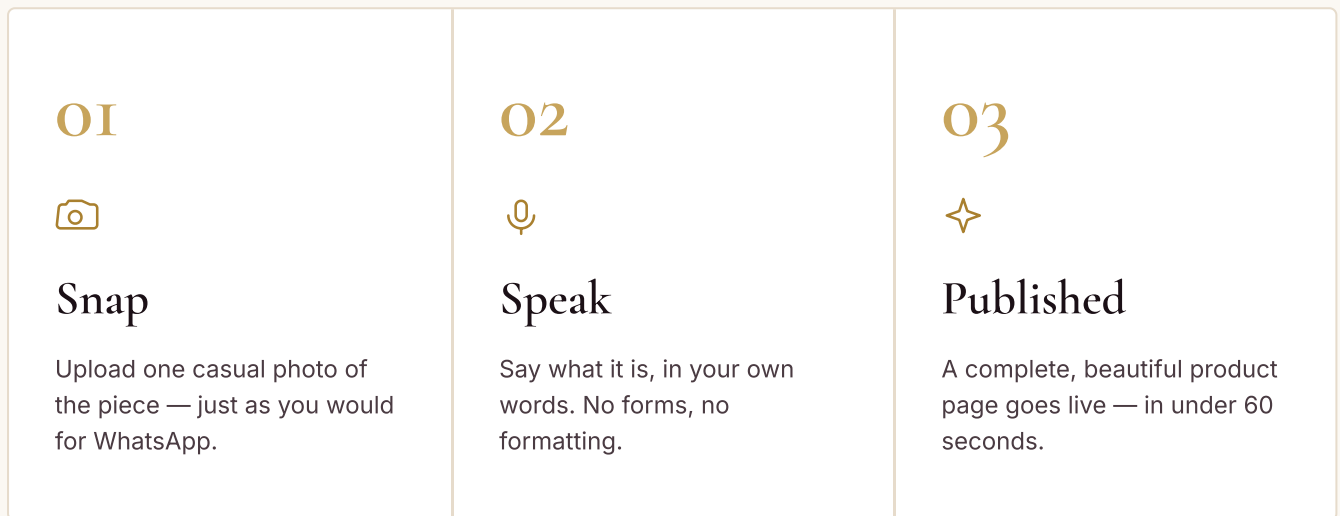

From hours of manual work to minutes of oversight.

HOW IT WORKS TODAY	HOW IT WILL WORK
Listing a new design takes 15–30 minutes of typing and formatting.	A photo and a voice note publish it in under a minute .
Orders arrive as scattered WhatsApp messages you handle one by one.	A real store, plus an AI assistant that answers and sells around the clock.
Retail and wholesale are mixed together and easy to confuse.	Two clean storefronts from one shared catalogue.
"How much is left?" is often a guess .	Live stock, plus dead-stock and low-stock at a glance.
Billing and books live in a separate app .	Purchases, sales, POS and ledgers built right in .
You get pulled into every small task .	The system flags only what truly needs you .

Nothing you rely on today is lost. Everything you do by hand becomes faster, clearer, and harder to get wrong.

One photo. One voice note. A finished product.

This is the heart of what makes the new Blythe Diva different. You handle the design — the system handles everything around it.

While you move to the next piece, the system writes the **title**, a search-friendly **description**, the **specifications and tags**, picks the **category**, designs the **product page**, and even generates a **model-shoot image** and a ready-to-post **banner**.

~~15-30 min~~ → under 60 sec

EVERY DESIGN, RETAIL-
READY AND
WHOLESALE-READY AT
ONCE

A retail boutique and a wholesale counter — from the same shelf.

Your customers and your retailers want different things. They each get a store built for them, while you manage just one catalogue behind the scenes.

FOR YOUR CUSTOMERS

Retail Store

- An elegant storefront with your full colour range on show
- Retail prices, MRP and offers, calculated automatically
- Smooth checkout — Cash on Delivery and online payment
- Reviews, testimonials and your Instagram reels, on-site

FOR YOUR RETAILERS

Wholesale Store

- Retailer sign-up that waits for **your approval**
- Wholesale rates, minimum order quantities and live stock
- Bulk ordering and outstanding balances, in one place
- Dealer-specific catalogues for your key accounts

One catalogue feeds both. Update a design once — both stores stay perfectly in sync.

Today, orders come in as WhatsApp links carrying a code and a product page. Tomorrow, those same buyers get a real store — and WhatsApp becomes a smarter, faster way in, not the only way.

The little things, handled for you.

Smart pricing

Give us your pricing formula once. Every design gets its retail price, MRP and wholesale rate worked out automatically. Change a single number, and the whole catalogue updates — no re-pricing by hand.

Your WhatsApp, upgraded

Your business number becomes an AI assistant that answers product questions, shares catalogues, checks stock and onboards retailers — then steps back the moment your approval is needed. After every order, it can even collect feedback for you.

Run it by voice

"Add 50 units to the Kundan collection." "Send the new catalogue to all retailers." "Generate an invoice for this retailer." Say it — and the website, stock, billing and WhatsApp all update together.

An operations manager that works 24×7.

A quiet assistant keeps an eye on the business and comes to you with the answer — not just the problem.

• Low stock to reorder

• Dead inventory to clear

• Payments outstanding

• Orders running late

• Fast-movers to restock

Everything on one screen

No more jumping between tabs and apps. Your dashboard brings the whole business together.

Sales, orders, retailers, payments, inventory health and pending approvals — choose any date range you like.

The unglamorous parts, done properly.

Billing & books

A familiar, Vyapar-style way to work: purchases by supplier and city, sales and POS billing, ledgers, cash & bank, returns, estimates and GST invoices — all in one place.

Shipping with Delhivery

Check if a pincode is serviceable, generate labels, schedule pickups, track every parcel live, and handle returns — your preferred courier, built in.

Marketing on autopilot

Post to Instagram and Facebook with captions written for you, show your reels on the website, and gather customer feedback over WhatsApp after each order.

Control & trust

Give each staff member exactly the access they need — nothing more — and keep an owner-approval (OTP) lock on the actions that really matter.

Built on modern, reliable technology — fast for your customers, dependable for you.

Hand us 20–30 of your designs. We'll show you the whole journey.

No slides, no theory. We'll take a real set of your pieces and walk it end-to-end — with your own pricing formula deciding retail and wholesale prices.

How we'll build it

PHASE 1 — THE PROOF

The live demo

Your designs, uploaded and selling across retail and wholesale, with billing and a dashboard.

PHASE 2 — ORDER & CONTROL

Inventory intelligence & permissions

Dead/low-stock rules, staff roles, owner approvals, supplier-bill matching.

PHASE 3 — THE ASSISTANTS

WhatsApp agent & voice commands

The AI assistant on your number, and run-by-voice operations.

PHASE 4 — REACH

Shipping, marketing & analytics

Delhivery, social auto-posting, Instagram on-site, Google Analytics & Maps.

PHASE 5 — SCALE

Polish & performance

Tuned to carry thousands of designs smoothly as you grow.

Less time on the screen.
More time on the *craft*.
A business that runs even when you're
not watching.

A FEW THINGS WE'LL NEED FROM YOU TO BEGIN

- Your retail and wholesale **pricing formula**
- The **WhatsApp number** to connect
- How you define "**dead stock**" (we'll suggest a sensible default)
- The **invoice format** you'd like to use
- Your **Delhivery** account details
- Your **20–30 sample designs** for the demo
